ALGARVE DENTAL IMPLANTS

PLACING DENTAL IMPLANTS SINCE 1987

For who?

Everybody using removable dentures, or those patients with loose, decayed and missing teeth, the all on four protocol offers a solution to gain back a self-confident smile in just one day.

Even if you have inquired about dental implants, but were told that you do not have sufficient bone left, this specific All on 4 technique works well without any bone transplant or sinus lift. We can anchor 4 implants and deliver a new fixed full bridge on the same day.

Safe?

The All on 4® protocol was developed more than a decade ago. Over the years our experience has grown and today we can state that the technique offers a totally safe and predictable protocol. Success percentage rates are the highest amongst all dental implant procedures.

Painful?

Strong local anesthesia in combination with sedative medication make that the surgery is not painful.

Patients report some discomfort during the following days.

Antibiotics, anti-inflammatory and pain control drugs are prescribed.

The All on 4 advantages?

- No need for bone augmentation
- Only one single operation
- Lower costs in comparison with 6 or 8 implant bridges
- Easier oral hygiene
- Individually adapted outstanding aesthetics
- Screw-retained construction makes prosthesis easy to repair
- Scientifically proven excellent long-term success rates
- Few treatment sessions, thus suitable for faraway patients
- 10-year guarantee against implant loss
- Best quality price

ISDI (International Service for Dental Implantology)

All-on-4®

Dr. Cris Piessens
INTERNATIONAL TRAINER IN ORAL SURGERY WITH IMPLANTS

- Dentist with over 30 years of experience in Implant Dentistry

All-on-4[®]

A new set of teeth in just 1 day

The protocol All on four (All on 4[®]) offers the possibility to replace all your teeth in one day.

Using only 4 implants, inserted in a specifically strategic way, your doctor can provide you with a full arch bridge on the same day.

Using distally 2 tilted implants, in combination with 2 parallel implants in the center, the construction is mechanically optimized to receive strong biting forces. Even in patients with little bone available, this technique offers a great solution.

Patients with shallow bone below the sinus, great bone loss due to gum disease or aging, can perfectly well be treated with this protocol. No bone transplant or sinus lift needed.

The tilted implants are anchored into solid strong basal bone, always present at the fossa canina.

This is where normally the roots of the canines are located.

A full arch acrylic bridge is delivered the same day.

These teeth are made individually and will match in color and shape to the characteristic of your face.

SAME DAY SOLUTION

I had my All on 4 treatment (or I would describe it as a fixed denture) in March this year and can thoroughly recommend Cris Piessens. Friends have commented on the natural look. The treatment was totally painless and immediate and the biggest plus is that it is for LIFE. I have spent so many hours and a lot of money in different countries avoiding having to have a loose denture. Many dentists told me there was no way I could have any more implants or any other treatment, just a full denture as I had too much bone loss. NOT TRUE and thanks to Cris Piessens I feel as though a weight has been lifted from me and I no longer live in fear of having to have dentures. By the way, it seemed very expensive to have this treatment but looking back on the cost of previous dental invoices over the years, it has probably cost about a 10th or less of what I have already spent. So, thank you X

Jill Swingler

Professional, full of experience, this Belgian-born doctor treated my dental implant problems with an adapted solution. Work with finesse and without post-operative pain. I recommend it to those looking for a real dental surgeon.

Laurent Guglielmetti

All his life my husband has had a phobia of dentist - any dentist - not because he is scared of pain - he can stand a lot - but his problem was gagging as soon as he opened his mouth for the dentist to start his work or even look at the problem.

Consequently he has neglected his teeth until desperate - and he found Dr. Chris Piessens on the internet - went to see him and a miracle occurred. No gagging - able to manage inspection, another appointment for extractions and implants in lower jaw - and all that it entails - and hey ho he can smile again and eat properly.

Shortly after my Husband's dental implants were completed successfully - I seriously broke a tooth so also went to see Dr. Chris - two implants later - I am smiling and can't sing his praises highly enough.

Dr. Chris has a lovely calming manner - gets on with the job quickly and efficiently - results perfect.

His surgery is easy to find - and moreover has all the modern equipment one would expect in such a up to the minute establishment.

Inspires confidence and highly recommence
